## Honi's Holistic/Green/Organic World :)

Welcome to my Holistic/Green/Organic World blog. I am excited to share the tips, suggestions & findings I come across via my on going research to enhance my Holistic Medical Spa for the better overall health of my clients. Please read, learn and feel free to share with others as together can make a difference in this world. To share is to LOVE, to give is to LOVE and to be happy you is LOVE from within. Spread the Love, Honi :)

### [holeco™ organic minerals featured at the D & A Show in LA at the GREEN Market Show](#)

So, you have a vision of this total chemical free organic mineral powder & you just cannot get your vendors to make. Everyone claims they have "*natural minerals*" and riding on consumers lack of knowledge of chemical, yet they put bismuth oxychloride, dimethicone, nano size or even titanium dioxide in their formula. How do you make the consumer aware to become savvy?

I said to myself "I will create it & I will educate the public on a safer product" and so I did. From initial thought to actual production, it has taken me over a year and it was a privilege to make it to the D & A GREEN Market show in LA this past weekend to launch my product. Thanks to a very special lady name Linda who shared the

same passion of pure cosmetics, **holeco™ organic minerals** became a reality.

Out of my own frustrations of needing a mineral powder to use for the post laser treatments I perform, I finally created **holeco™ organic minerals**, made out of only MICA, ORGANIC ARROWOOD, IRON OXIDE & ZINC OXIDE. That's right. Only 4 ingredients and NO chemicals what so ever.

I called them "*one and only*" to highlight their true essence of being the purest all natural minerals that are handcrafted in the US with the highest quality ingredients that has full sun protection and anti-microbial properties.

**"holeco™ organic minerals"** give an amazing healthy glow that feels extremely silky. This incredible loose mineral powder is vegan and is conveniently located inside a retractable dispensing brush made of

cruelty free goat hair. The organic mineral foundation helps absorb excess oil while healing skin by being hypo-allergenic, weightless and water resistant.

**holeco™ organic minerals"** come in 6 different shades (1-6) that are based on Fitzpatrick classification for sun-reactive skin types & can be used for both foundation and bronzing blush (shades 3,4,5 & 6).

**GREEN HIGHLIGHTS:**

hand crafted in the USA; no animal testing; cruelty free goat hair; vegan loose powder; packaging is a brush holder pouch made out of eQo hemp fabric; clear plastic is made out of PETA and can be recycled; dispensing brush is washable, reusable and refillable; only four ingredients used; bamboo retail display; vegetable ink used on all printing FSC certified paper for marketing material

**Retail Price:**

\$58 4g Big Brush

\$32 2g Mini Brush

@ our store or online;

opening orders available for holistic & organic mind set facilities such as: spas/medical spas/yoga studios/fitness spas/dermatology offices/pediatrician office/baby stores/online safe cosmetics...etc
