

zosimos botanicals

Considering that most body products are full of chemicals, a clean product line such as Zosimos Botanicals is a great alternative. These products are made with pure ingredients, and scented subtly with flower essences. The Cocoa Salt Scrub is absolutely amazing. It nurtures the skin with skin soothing ingredients such as Almond oil, Aloe Vera, and Vitamin E. Exfoliating ingredients slough dead skin, while natural oils leave the skin feeling silky smooth. This scrub leaves one feeling revitalized.

eco-deck

These cards are a playful alternative for a regular deck of playing cards. They are printed on recycled cardstock with soy-based ink. Each suit has a different environmental theme. For example, each diamonds card has a different fact about water on it. These are excellent eco-education cards for children and adults. Eco-decks are a fun way to learn more about the environment and what positive changes we can make for our planet.
